FRONT COVER

IMPORTANT:

- Create artwork using a CMYK colour mode
- Resolution must be 300dpi
- Delete the template layer before saving your artwork

Bleed Area: The Bleed area extends out 3mm from the edge of your finished document. All images or colours that print to the edge of your document should be extended into this area to avoid any chance of any white lines appearing. Do not place any content that you wish to appear in your document in this area as it will be trimmed off.

Non Text Area: Avoid putting any text 3mm from the edge of the document. Text placed in this area will run very close to the edge of the document and could possibly get trimmed off. If possible also avoid using any thin borders in this area as you may get an inconsistent thickness.

Trim Area: This is the finished size of your document. Anything placed outside of this area will be trimmed off.

Fold Area: This is the fold line for your document. Keep all text at least 3mm away from this line.

HOW TO CREATE YOUR PRINT READY PDF:

1. Delete the template layer
2. File > Save as >
3. Format > Adobe PDF >
4. Adobe PDF Preset > PDF/X-4:2008 >
5. Save PDF
6. **Open PDF and check to ensure it appears correctly**
